DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a method or system for generating a differential image of an object in a light scattering medium, a single burst of illuminating light to generate reflected light, providing a first charge storing device (first CCD device) and a second charge storing device (second CCD device), each of which is independently operatively coupled to said charge generating photosensitive device; storing charge on said first charge storing device during a first part of the period of time wherein a first image is defined,; storing charge on said second charge storing device during a remaining part of said period of time wherein a second image is defined ; and generating a difference between the first image and the second image, and used in combination with all of the other limitations of the claims 1, 8 or 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. French et al. U.S. 5,233,415 discloses samples the laser output at or near the source to obtain a reference of the signal intensity distribution. This reference signal includes any anomalous spatial intensity distributions (associated with the output of the laser transmitter) which can then be discounted or subtracted out from the signals received from the target area of interest.
 - b. Hugenin et al. U.S. 5,047,783 discloses a noise cancellation method and apparatus that automatically supplies a background signal which is subtracted from the imaging signal.
